

Eduroam Configuration Assistant Tool (CAT)

Android Device:

The Eduroam CAT tool is a customised installer which will configure your wireless card for access to the UL eduroam wireless service. The following instructions are for Android Devices.

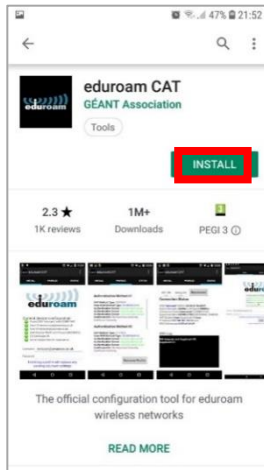

1. Select setup_eduroam wireless network.
2. Your device will display a splash page once connected to this SSID with additional information.
 - a. On some Android devices you will need to select the three dots in the top right hand corner and select “open in browser”. (If this option is not available it may have already opened in a web browser.)

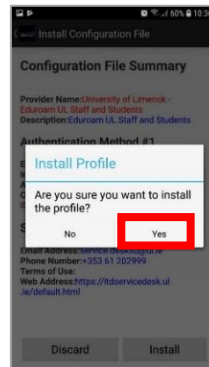

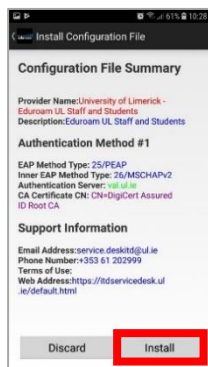

3. After you connect you will be redirected to www.ul.ie/eduroam with a step by step guide to install the cat tool for your device.

How do I install Wireless on my Android Device

4. After you have read these steps please click on “eduroam setup” located on this page and you will be redirected to the “Play Store” to download the “eduroam CAT” application.

5. Once installed on your system open the application.
6. The application will request to access the devices location. Select allow to display the nearby eduroam configuration profiles.
7. Select the University of Limerick from the list of institutions.
8. EduroamCAT application will request access to the phone storage to download the configuration file. Select allow to continue the install process.
9. Select Install.

10. Enter your username and network password.
 - a. N.B For staff type in the form firstname.lastname@ul.ie
 - b. N.B For students type in the form studentid@studentmail.ul.ie

11. Click install

12. You are now connected to the Eduroam network. You can close out of the application. Verify you are connected to eduroam and not setup_eduroam.
